Subject: Green River Suspended Solids Data
Attachments: GreenSuspendedSed_Metadata_2020-10-17.xlsx; GreenSuspendedSedAll_2020-10-16.xlsx; GreenSuspendedSedSummary_2020-10-16.xlsx

Hi everyone,

Attached is the suspended solids database compilation for the Green River inputs into the East Waterway Anthropogenic Background determination. These data have been compiled from multiple sources and cleaned for consistency between datasets. This took longer than expected as the datasets are large, but we did perform quality control checks. Three files are attached:

1. **GreenSuspendedSed_Metadata_2020-10-17.xlsx.** This file provides the metadata for each of the other two files, including database file column descriptions and study citations.
2. **GreenSuspendedSedSummary_2020-10-16.xlsx.** This file includes the concentrations for Total PCBs Congeners, Total PCBs Aroclors, Dioxin/Furan TEQ, and Arsenic, along with sample information (e.g., Green River Flow designation at the time of sampling)
3. **GreenSuspendedSedAll_2020-10-16.xlsx.** This file includes the concentrations for Total PCBs Congeners, Total PCBs Aroclors, Dioxin/Furan TEQ, Arsenic, and congeners.

Greg Brunkhorst from Anchor QEA is most familiar with these files. Greg is happy to walk anyone through the data files; please reach out to him if you have any questions (260-971-2668; gbrunkhorst@anchorqea.com).

We are still compiling the water data for the lower Green River and will send that as soon as it is available.

Thanks
Dan
